

a) Competition vs facilitation.

Criterion #1: Conspecific & Heterospecific

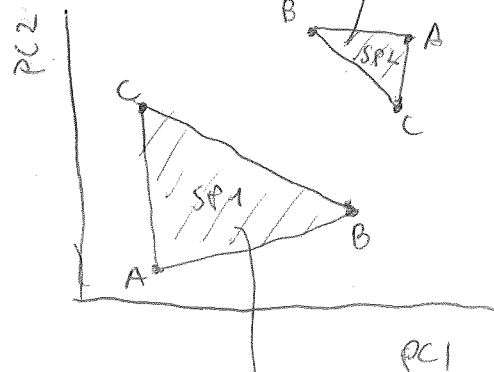

Criterion #2: Animal preference self-pollinator.

c) Flexibility of strategy.

shared pollinators
relative abundance
visit effectiveness
functional originality

PCA

Competition for pollinator niches

rigid strategy. (niches are closer)

3 communities:
A, B, C

2 species
SP1, SP2.

flexible strategy
(niches are far from each other)
